

Categorisation of Wound Care and Associated Products

Version 13 – September 2024

SECUREMENT AND TRADITIONAL DRESSINGS

Wound Dressings	Traditional Wound Dressings	Absorbent Wadding	
		Absorbent Dressings	
		Surgical Wound Dressings	
		Cellulose Wadding	
		Gauze and Cellulose Wadding	
		Eye Pads	
		Low Adherent Absorbent Dressings	
		Tulles – Non-adherent	
		Absorbent Pad with Nonwoven Adhesive Border	
		Traditional Antiseptic Dressings	
		Finger and Toe Dressings	
	Packs	Dressing Packs	
		Procedure Packs	
First Aid Kits			
Swabs	Swabs	Topical Swabs	Gauze
			Non-woven
		X-Ray Detectable Swabs	Standard swabs
			Abdominal swabs
			Coloured swabs
		Filmated Swabs	
		Tied-5s	
Ribbon Swabs			
Pledgets			
Taping	Adhesive Tapes	Acrylate Adhesive Tapes	Paper
			Plastic impermeable
			Plastic perforated
			Silk
			Foam
		Kinesiology Tapes	
		Zinc Oxide Tapes	
		Silicone Adhesive Tapes	With backing paper
	Without backing paper		
	Other Fixation Tapes		
Sheets	Fixation Sheets		
Device Securement	IV Fixation	Film IV Dressings - Standard MVP	Plain
			Reinforced film with tape strips
			All other types
		Film IV Dressings - High MVP	Plain
			Reinforced film with tape strips
			All other types
		Non-woven IV Dressings	
		Antimicrobial IV Dressings	Chlorhexidine
All other types			

This category listing is for general guidance only and cannot represent the clinical differences between wound management products within the various categories.

When deciding upon the suitability of any particular product, the SDMA strongly recommends consideration be given to the manufacturer's indications for use, performance data, supporting clinical evidence, and expert clinical opinion.

	Insertion Site Dressing	Antimicrobial Discs	Silver
			Chlorhexidine
			PHMB
	Other	Other Types	
		Drain Fixation Dressings	
		All Other Types	

BANDAGES

Compression Bandaging and Components	Multi-Layer Kits	Full Compression – 2 layer	Latex
			Latex free
		Full Compression – 4 layer	Latex
			Latex free
	Reduced Compression 2-layer	Latex	
		Latex free	
	Reduced Compression 3-layer	Latex	
		Latex free	
	Individual Kit Items	Type 3c Bandages	Latex
			Latex free
		Type 3b Bandages	Latex
			Latex free
		Type 3a Bandages	Latex
			Latex free
	Type 2 Bandages	Latex	
		Latex free	
Sub-bandage Padding	Synthetic fibre		
	Natural fibre		
	Foam		
Other Compression Bandages	Short Stretch Non-Cohesive Bandages		
	Short Stretch Cohesive Bandages		
	Other Cohesive Bandages		
	Finger and Toe Bandages		
Traditional Bandages	Conforming Bandages	Retention Bandages – Non-cohesive	
		Retention Bandages – Cohesive	Latex
			Latex free
		Crepe Bandages	
	Open Wove Bandages		
	Stretch Bandages	Non-Adhesive Stretch Bandages	
		Elastic Adhesive Bandages	Latex
	Latex free		
	Other Bandages	Zinc Oxide Paste Bandages	
		Inelastic Adhesive Bandages	
Triangular Bandages			
Tubular Bandages		Linear	
	Pre-shaped		

This category listing is for general guidance only and cannot represent the clinical differences between wound management products within the various categories.

When deciding upon the suitability of any particular product, the SDMA strongly recommends consideration be given to the manufacturer's indications for use, performance data, supporting clinical evidence, and expert clinical opinion.

ADVANCED WOUND MANAGEMENT

Wound and Post-Operative Dressings	Foams	Non Adhesive	Moderate-high exudate
			Low-moderate exudate
		Adhesive	Moderate-high exudate
			Low-moderate exudate
		Low Trauma Adhesive – Bordered	Moderate-high exudate
			Low-moderate exudate
		Low Trauma Adhesive – Non-Bordered	Moderate-high exudate
			Low-moderate exudate
		Anatomically-shaped	Heel
			Sacrum
			Finger and toe
			All other types
		Other Types	Analgesic Foams
			Moisturising Surfactant Foams
			Foams containing superabsorbents
	Foam cavity dressings		
	Foams with gelling fibres		
	Dressing change indicator		
	All other types		
	Hydrocolloids	Hydrocolloid Dressings – Standard	Non-bordered
			Bordered
		Hydrocolloid Dressings - Thin	Non-boarded
	Bordered		
		Hydrocolloid Cavity Paste Dressings	
	Wound Contact Layers	Hydrogel	
		Textile	
		Soft polymer	
		Silicone	
		Other Types	
	Tracheostomy Dressings	Foam	
		Textile	Adhesive
	Non-adhesive		
	Film Dressings	Semipermeable Film Dressings	High moisture vapour permeability
Standard moisture vapour permeability			
Non-Sterile Films			
Film Dressings with Absorbent Pads		Standard absorbent pad	
		Transparent absorbent pad	
		Thin foam absorbent pad	
Low Trauma Film Dressings			
Spray Film Dressings			
Other Types			
	Alginate Dressings	Alginates - Ropes and Ribbons	Dispersible
			Non-dispersible

This category listing is for general guidance only and cannot represent the clinical differences between wound management products within the various categories.

When deciding upon the suitability of any particular product, the SDMA strongly recommends consideration be given to the manufacturer's indications for use, performance data, supporting clinical evidence, and expert clinical opinion.

		Alginates Sheets – Bordered	Dispersible
			Non-dispersible
		Alginates Sheets – Non Bordered	Dispersible
			Non-dispersible
		Other Types	
		Gelling Fibre Dressings	Ropes and Ribbons
	Sheets		
	Other Types		
	Superabsorbent Dressings	Adhesive	
		Non-Adhesive	Backed
			Non-Backed
		Low Trauma – Bordered	
		Low Trauma – Non Bordered	
	Other Types		
	Hydrogel Dressings	Amorphous Hydrogels	
		Sheet Hydrogels	Bordered
			Non-bordered
		Textile Impregnated with Hydrogel	
	Other Types		
	Other Dressings	Combination Dressings	Adhesive
Non-adhesive			
Capillary Action Dressings			
MMP Modulation Dressings		Collagen based	
		Carbon based	
		All other types	
Bio-Synthetic Dressings			
Products with Extra Cellular Matrix Components			
Cavity Wound Dressings			
All Other Types			

ODOUR MANAGEMENT

Odour Management	Charcoal	Primary Dressings	
		Secondary Dressings	
		Composite Dressings	
	Other Products	All Other types	

WOUND CLEANSING SOLUTIONS

Wound Cleansing	Wound Cleansing Solutions	Surfactant		
		Antimicrobials		
		Others		
		Surfactant		
		Antimicrobials		

This category listing is for general guidance only and cannot represent the clinical differences between wound management products within the various categories.

When deciding upon the suitability of any particular product, the SDMA strongly recommends consideration be given to the manufacturer's indications for use, performance data, supporting clinical evidence, and expert clinical opinion.

	Wound Cleansing Gels	Others

BACTERIAL MANAGEMENT

Silver	Alginate Dressings	Alginates - Ropes and Ribbons	Dispersible
			Non-dispersible
		Alginates Sheets – Bordered	Dispersible
			Non-dispersible
		Alginates Sheets – Non Bordered	Dispersible
			Non-dispersible
		Other types	
	Foams	Non Adhesive	
		Adhesive	
		Low Trauma Adhesive – Bordered	
		Low Trauma Adhesive – Non-Bordered	
		Anatomically-shaped	Heel
			Sacrum
			All other types
		Other Types	Moisturising surfactant foams
			Foam cavity dressings
	All other types		
	Gelling Fibre Dressings	Ropes and Ribbons	
		Sheets	
		Other Types	
	Wound Contact Layers	Textile	
		Soft polymer	
		Silicone	
		Other Types	
	Other	Charcoal Dressings	
		Barrier Dressings	Short Duration
			Long Duration
		MMP Modulation	Collagen based
Other Types			
PHMB	PHMB	Foams	
		Bio-Synthetic Dressings	
		Gauze	
		Other Types	
DACC	DACC	Swabs	
		Ribbons	
		Wound Contact Layers	
		Absorbent Pads	
		Foam Dressings	
		Post-Operative Dressings	
		Other Types	

This category listing is for general guidance only and cannot represent the clinical differences between wound management products within the various categories.

When deciding upon the suitability of any particular product, the SDMA strongly recommends consideration be given to the manufacturer's indications for use, performance data, supporting clinical evidence, and expert clinical opinion.

Chlorhexidine	Chlorhexidine	Wound Contact Layers	
		Other Types	
Honey	Honey	100% Honey	
		Ointments and Gels	
		Wound Contact Layers	
		Absorbent Fibre Dressings	
		Honey Hydrogel Dressings	
		Other Types	
Iodine	Povidone-iodine	All Types	
	Cadexomer-iodine	All Types	
Reactive Oxygen Species	Wound Gel	All Types	
All Other Types	All Types	All Types	

SPECIALIST BURNS AND SCAR MANAGEMENT

Burns Management	Moisture Control Products	Hydrogels	
		Other Types	
	Contact Materials	All Types	
	Wound Bed Preparation	All Types	
	Other	Anti-shear Wound Dressings	
		Biosynthetic Dressings	
Other Types			
Scar Management	Silicone Gel	Sheets	
		Amorphous	
	Other Creams, Gels and Sheets	All Types	
	Burns and Scars Compression Garments	Ready-to-Wear	
		Custom-Made	

DEBRIDEMENT – SKIN AND WOUNDS

Debridement	Equipment	All Types		
	Mechanical Debridement	Monofilament		
		Polyurethane Foams		
		Microfibre		
		Other Types		
	Biosurgery	Larvae	Bagged	
			All other types	
		Leeches		
		Other Types		

This category listing is for general guidance only and cannot represent the clinical differences between wound management products within the various categories.

When deciding upon the suitability of any particular product, the SDMA strongly recommends consideration be given to the manufacturer's indications for use, performance data, supporting clinical evidence, and expert clinical opinion.

COMPRESSION GARMENTS

Compression Garments	Vascular and Oedema Ready-to-Wear	Upper Limb – Circular Knit	British standard
			RAL standard
			Other standards
		Upper Limb – Flat Knit	British standard
			RAL standard
			Other standards
		Lower Limb – Circular Knit	British standard
			RAL standard
			Other standards
		Lower Limb – Flat Knit	British standard
			RAL standard
			Other standards
		Leg Ulcer Hosiery Kits	
		Hosiery Applicators	
	Adjustable Velcro Wraps	Upper limb	
		Lower limb	
	Wrap Liners		
	Hosiery Liners		
	Other Types		
	Vascular and Oedema Custom Fit	Upper Limb – Circular Knit	British standard
			RAL standard
			Other standards
		Upper Limb – Flat Knit	British standard
			RAL standard
			Other standards
		Lower Limb – Circular Knit	British standard
			RAL standard
Other standards			
Lower Limb – Flat Knit		British standard	
		RAL standard	
		Other standards	
Leg Ulcer Hosiery Kits			
Adjustable Velcro Wraps		Upper limb	
	Lower limb		
Wrap Liners			
Hosiery Liners			
Other Types			
Anti-Embolism Stockings	All Types		

This category listing is for general guidance only and cannot represent the clinical differences between wound management products within the various categories.

When deciding upon the suitability of any particular product, the SDMA strongly recommends consideration be given to the manufacturer's indications for use, performance data, supporting clinical evidence, and expert clinical opinion.

ORTHOPAEDIC PRODUCTS

Casting	Traditional Casting	Plaster of Paris		
		All Other Types		
	Lightweight	Synthetic – Rigid	Fibreglass	
			Polyester/Polyurethane	
		Synthetic – Semi-rigid	Fibreglass	
			Polyester/Polyurethane	
	Other Types			
	Undercast Padding	Natural		
		Synthetic	Textile	
			Foam	
Other Types				
Splinting	Splinting	Fibreglass		
		Low-therm plastics		
		Other Types		
Accessories	Accessories	Shoes		
		Stockinette		
		Braces		
		Hinges		
		Underwrap		
		Cast Protectors		
		Other Accessories		

WOUND CLOSURE

Wound Closure	Adhesive Strips	Textile	
		Polymer	
		Reinforced	
		Elastic	
	Tissue Glues	Cyanoacrylate	
		Other Types	
	Devices	Clips	
		Staples	
		Sutures	

This category listing is for general guidance only and cannot represent the clinical differences between wound management products within the various categories.

When deciding upon the suitability of any particular product, the SDMA strongly recommends consideration be given to the manufacturer's indications for use, performance data, supporting clinical evidence, and expert clinical opinion.

SPECIALIST THERAPIES

Topical Negative Pressure Wound Therapy	Topical Negative Pressure Wound Therapy	Canisters	
		Foam Dressing Kits	
		Gauze Dressing Kits	
		Accessories	
		All other dressings	
		Standard Pumps	
		Instillation Pumps	
		Single Use NPWT Systems	With canisters Without canisters
Haemostatic Dressings	Oxidised Cellulose	All Types	
	Carboxymethylcellulose	All Types	
	Chitosan	All Types	
	Other	All Other Types	
Topical Oxygen Therapy	Topical Oxygen Therapy	Consumables	
		Equipment	
		Other	
Other Specialist Therapies	Electrical Stimulation Device	Consumables	
		Equipment	
	Ultrasound Therapy	Consumables	
		Equipment	
	Beta-Glucan	Gel	
	Topical Haemoglobin	All Types	
Other types			

ASSESSMENT TOOLS

Assessment Tools	Wound Mapping Devices	All types	
	Wound Diagnostics	All types	

FRACTURE PREVENTION

Fracture Protection	Hip Fracture Protectors	Soft Shell	
		Hard Shell	
		Other Types	
	Wrist Fracture Protectors	Rigid Support	

This category listing is for general guidance only and cannot represent the clinical differences between wound management products within the various categories.

When deciding upon the suitability of any particular product, the SDMA strongly recommends consideration be given to the manufacturer's indications for use, performance data, supporting clinical evidence, and expert clinical opinion.

SKIN INTEGRITY PRODUCTS

Pressure Ulcer Prevention	Protection Devices	Pressure Relief Devices	Dermal pads
			Offloading devices
			All other types
	Anti-friction devices	Textile	
All other types			
Other Types			
Contact Materials	All types		
Peri-Wound and Skin Protection Including MASD	Skin Protectants	Film-forming	Swabs
			Sprays
			Wipes
			All other types
		Creams	Dimethicone
			All other types
	Skin Protectants with Adhesives		
	Other Types		
	Skin Cleansers	Foams and Sprays	
		Wipes	Dimethicone wipes
			Cleansing wipes
			Bathing wipes
			All other types
Other Types			
Skin Fold Management	Wicking Fabric	With antimicrobial agent	

OTHER PRODUCTS

Adhesive Removers	Adhesive Removers	Wipes	
		Sprays	
		Other Types	
Exudate Collection	Wound Fluid Collection Products	Bags	
		Drains	
		Other Types	

This category listing is for general guidance only and cannot represent the clinical differences between wound management products within the various categories.

When deciding upon the suitability of any particular product, the SDMA strongly recommends consideration be given to the manufacturer's indications for use, performance data, supporting clinical evidence, and expert clinical opinion.
